Johan Ekström

Senior .NET Developer

Gothenburg, Sweden | johan.ekstrom@example.com | +46 70 000 00 00 | github.com/example-jekstrom

PROFILE

Backend-focused .NET developer with 7 years of experience designing and running cloud services on Azure. Strong in C#, ASP.NET Core and SQL Server, with hands-on ownership of microservices, messaging and CI/CD. Comfortable leading small teams and mentoring juniors; currently deepening skills in distributed systems design and observability.

EXPERIENCE

Senior .NET Developer

2022 - present

Fabrikam Logistics, Gothenburg

- Lead developer for the shipment-tracking platform: 14 ASP.NET Core microservices on Azure Kubernetes Service handling 40 million events per day.
- Replaced a polling integration with Azure Service Bus and the outbox pattern, cutting end-to-end delivery latency from 5 minutes to under 10 seconds.
- Introduced OpenTelemetry tracing and Application Insights dashboards; mean time to resolve incidents dropped by roughly 40 percent.
- Mentor three developers and run the weekly architecture review; led the .NET 8 upgrade.

.NET Developer

2019 - 2022

Contoso Bank, Stockholm

- Built REST and gRPC APIs in ASP.NET Core for the mobile banking app (about 600,000 monthly users).
- Designed the payments ledger schema in SQL Server with Entity Framework Core; added optimistic concurrency and idempotency keys to prevent double payments.
- Reduced p95 response time of the account overview endpoint from 1.2 s to 180 ms with query tuning and Redis caching.
- Set up Azure DevOps pipelines with automated xUnit and integration test runs on every pull request.

Junior Developer

2017 - 2019

Northwind Retail, Stockholm

- Maintained an ASP.NET MVC e-commerce site and migrated parts of it to ASP.NET Core.
- Wrote background jobs with Hangfire for order exports and nightly stock synchronisation.

SKILLS

Languages: C#, T-SQL, TypeScript (basic), Bash
Frameworks: ASP.NET Core, Entity Framework Core, Blazor, MassTransit, MediatR, xUnit, Moq
Cloud & DevOps: Azure (AKS, App Service, Functions, Service Bus, Key Vault), Docker, Kubernetes, Terraform, Azure DevOps, GitHub Actions
Data & Messaging: SQL Server, PostgreSQL, Redis, Azure Cosmos DB, RabbitMQ
Practices: Clean Architecture, Domain-Driven Design, CQRS, TDD, code review, incident on-call

EDUCATION

MSc Computer Science and Engineering

2012 - 2017

Chalmers University of Technology

CERTIFICATIONS & LANGUAGES

Microsoft Certified: Azure Developer Associate (AZ-204), 2021
Swedish (native), English (fluent), German (basic)
